-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 September 2003.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. **Claims 1-26** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,618,578 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the current application recites:

A system for communicating with a remote communication unit via a public switched telephone network (PSTN), comprising:

a personal data access device executing a program that is to communicate with the remote communication unit via the PSTN;

a first radio frequency (RF) transceiver associated with the personal data access device and in communication with the program, wherein the first RF transceiver is controlled by the program;

a public, pay-type telephone, electrically connected for communication over the PSTN;

a second RF transceiver interfaced with the telephone, the second RF transceiver configured for communication, via an RF link, with the first RF transceiver; and

a controller interfaced with the telephone, responsive to communications received from the first RF transceiver to communicate over a data communication link via the PSTN to the remote communication unit designated by the personal data access device, the controller being configured to allow data communications over the PSTN, the controller and the program being further configured to maintain two-way communication between the personal data access device and the remote communication unit via the PSTN and the RF link, and the controller being further configured to terminate the data communication link over the PSTN to the remote communication unit designated by the personal data access device, wherein responsive to receiving from the first RF transceiver a termination communication that originated from the program, the controller terminates the data communication link.

The main differences between the claim 1 of the current application and claim of Patent Number 6,618,578 are those underlined lines above which is no more than a different way of saying: "...seize a phone line, initiate, and establish a data

communication link over the PSTN ..." as claimed in claim 1 of Patent Number 6,618,578.

Similarly, **claims 8 and 21** of the current application are substantially similar to claims 1 and 8 of Patent Number 6,618,578 with wording variations only.

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sonny TRINH whose telephone number is 571-272-7927. The examiner can normally be reached on Monday-Thursday.
